

Traversing Divides: Interdisciplinary Research in Population Health and Health Disparities

October 1, 2019 9:30 AM- 5:00 PM

Sheraton Seattle Hotel

Seattle, Washington

This one-day workshop provides an orientation to the value of interdisciplinary collaboration, challenges inherent in interdisciplinary work, and skills and resources that facilitate interdisciplinary success in population health science. Workshop participants will engage with leading population health and interdisciplinary scholars in interactive group exercises and case studies with a focus on the combining the knowledge, theory, and methods of diverse fields to understand and address health disparities. View the agenda and register [here](#).

The workshop is open to scientists training and/or working in any field that contributes knowledge relevant to understanding the causes of health disparities at multiple levels of analysis (from the molecular to the societal and environmental) and/or the ways in which health disparities can be ameliorated. Students and early career scientists are especially encouraged to apply, but individuals at all career stages are welcome. Students must have completed at least two years of post-baccalaureate training in a discipline.

The deadline for workshop applications is May 5, 2019. Applicants will be notified by the end of June. Workshop enrollment is limited to facilitate the success of small-group activities. Funding to defray travel costs will be available on a limited basis. Please contact Sue Bevan (sbevan@iaphs.org) with any questions.

The workshop is held in conjunction with the [IAPHS Annual Conference](#), which begins the evening of October 1 and ends midday October 4. [Conference registration is now open](#) and must be completed separately from any workshop application.

The workshop is supported by a grant from the National Institute on Minority Health and Health Disparities and by the Robert Wood Johnson Foundation.

The Interdisciplinary Association for Population Health Science (IAPHS) is a membership organization of scientists and population health practitioners dedicated to advancing the interdisciplinary science of population health and the translation of this science to improve population health and equity. IAPHS connects population health scientists across disciplines and sectors through conferences, a blog, and other online communications. It also carries out a variety of activities to support population health scientists in their careers. For more information, please visit our website at <https://iaphs.org>.
